Kulkul Tech × Ladies In Tech

Indonesia

Relevant coursework: Java, OOP, Spring Boot, Angular, JavaScript, REST API, Swagger.

Oct 2025 - Jan 2026

EXPERIENCES

AI LABORATORY, UNIVERSITAS PADJADJARAN

Sumedang, Indonesia

Undergraduate Research Assistant

May 2026

- Conducted a Systematic Literature Review (SLR) focusing on privacy frameworks and conversational AI structures within higher education ecosystems.
- Screened over 1,000 academic articles from the Scopus database, systematically filtering the selection down to 47 highly relevant papers.
- Authored a technical review manuscript on The Security of Conversational AI usage in higher education, structuring the draft to align with Nature journal publication standards.

CSG INTERNATIONAL

Remote

Software Engineer Intern

Feb 2026 - May 2026

- Modernized frontend architecture for the Quote/Order Portal interface by executing Phase 3 of the Tailwind CSS migration, successfully eliminating legacy Bootstrap dependencies.
- Migrated presentational layout components to utility-first classes, isolating coupled legacy CSS to reduce technical debt.
- Engineered interactive UI upgrades, implementing Flatpickr for datepickers, and collaborating on architectural replacement for Bootstrap Select.
- Resolved 5+ high-priority tickets involving API response handling and UI-state management in Angular.

SAFEENA ACADEMY

Bandung, Indonesia

User Experience Designer Intern

Nov 2025 - Jan 2026

- Designed high-fidelity interactive prototypes in Figma for the company profile and Learning Management System (LMS), translating complex user requirements into clean, user-centric interfaces.

WARTA KEMA, UNIVERSITAS PADJADJARAN

Sumedang, Indonesia

Editor in Chief

Dec 2024 - Dec 2025

- Directed editorial operations for a multi-department media organization, overseeing the end-to-end production pipeline of over 40 journalistic works while ensuring high editorial standards.
- Optimized digital media publishing workflows, driving audience growth to 7,000+ followers and streamlining cross-functional coordination.
- Elevated brand visibility and student engagement, leading content strategy initiatives that earned the 'Most Innovative Social Media' recognition at the Unpad Awards 2025.

PROJECTS

ZICHARA: AR-BASED MANDARIN LITERACY APP

Mar 2026 - Jun 2026

- Served as Project Manager and QA for an AR mobile app transforming Hanzi learning into a physical discovery experience.
- Coordinated a team of 5, designing user flows, handling sound design, animation, and documentation.

Skills: Project Management, QA, AR, Unity, UI/UX

PANGANESIA: WEB PLATFORM FOR FOOD DIVERSIFICATION

Mar 2026 - Jun 2026

- Developed the frontend of a web-based educational platform and marketplace supporting food diversification in Indonesia.
- Managed complex state, API integrations, and executed a mid-sprint architecture migration to Supabase and Prisma.

Skills: Frontend Development, Next.js, React, Supabase, Prisma

NARA TRAD: STOCK PORTFOLIO TRACKER

Nov 2025 - Jan 2026

- Developed a full-stack stock portfolio tracking web app helping beginner investors monitor assets simply.
- Engineered the backend using Java Spring Boot and PostgreSQL, integrating real-time stock data from Finnhub API.
- Collaborated in an Agile team of three, managing testing and deployment pipelines using Vercel and Railway.

Skills: Full Stack Web Development, REST API, Java, Spring Boot, Angular

ADDICX: ADDICTION RECOVERY APP

June 2025 – July 2025

- Designed UI/UX for a mobile application targeting youth addiction recovery through gamification and AI mentorship for GEMASTIK XVIII.
- Conducted user research, usability testing (SEQ, SUS), and iterative prototyping to create an empathetic, stigma-free interface.

Skills: UI/UX Design, Figma, User Research, Prototyping

ADDITIONAL

Technical Skill: Java, Python, JavaScript, HTML/CSS, Golang, Spring Boot, Angular, React.js, Tailwind CSS, MySQL, PostgreSQL, Figma.

Soft Skill: Storytelling, Technical Writing, Empathy & Social Responsibility, Teamwork, Project Management, Problem Solving.
